

## Business Card Template

When designing onto this template, nothing should extend to the outer edge of the document other than items that extend right to the edge of your cards, like a background colour or all-over image for example.

The first guide lines show where the cards will be cut. (3mm in all round)

The inner guides show the 'safe' area for your design. (6mm in all round)

You should try to keep all your text and images within these inner guides to avoid the possibility of anything on your cards being 'clipped' when we cut them.

Please ensure you remove these instructions before starting your design.
